Career Objetive

As a passionate web developer, my goal is to create scalable and innovative web applications that make a difference. I am eager to join a dynamic team where we can work together, learn from each other, and grow both personally and professionally.

Aiming For

- Front-End-Developer
- Office | Hybrid | Remote

Education

Responsive Web Design	**Oct 2022 - Dec 2022**
Freecodecamp	
Certificate	
JavaScript Algorithms and Data Structures	**Dec 2022 - May 2023**
Freecodecamp, San Francisco, California	
Certificate	
Front End Development Libraries Certification	**May 2023 - Aug 2023**
Freecodecamp, San Francisco, California	
Certificate	

Experience

Freelance Web Developer	**2018 - 2023**
Remote	

- I participated in the development of https://fincamaranata.site/ and https://nescritor.com/ using Wordpress CMS. I was responsible for designing and developing the user interface, making sure it was responsive and adapted to different screen sizes and devices.
- Over 5 years of experience in writing content for websites and applications based on SEO best practices.

Projects 2023-2023

- A practical, responsive, and functional Pokédex that uses an API to fetch data online and display it in the app. Built with JavaScript, React, and AntDesign. View Project Online

- A Pomodoro Clock functional app created on JavaScript, React.js, Redux. It is an application whose main objective is to show my knowledge and understanding about Redux and how I can use this technology in larger applications. View Project Online.
